

URL Systems, Inc. is a rapidly growing software development company that specializes in designing, deploying, developing, managing and administering business in IT, IT enabled services and technology markets. We offer companies the best total solutions they need to grow and prosper. Headquartered in New Jersey in USA, tends to make major wave of change in information technology. At URL Systems we are committed to working with clients to understand their business inside and out and to earn a level of trust that goes beyond the typical Client-Supplier relationship. We enjoy lasting, ongoing relationships with our clients and consider ourselves a partner in their success. Our company offers innovative solutions for the Business-to-Business and Business-to-Consumer markets.

The growth of URL Systems is directly related to URL System's recruiting and retention of top-notch software professionals for both engineering and corporate IT customers. Our unique methods and best-case practices will result in continuous growth in client base. As a company, one can be sure our candidates are pre-screened and are motivated to make a career change for the right opportunity. We extensively interview the candidate before introducing them to our clients. Our team does whatever necessary to ensure that the complete process from initial phone screening all the way to their client job is performed without error, or even a single hitch, the first time - every time. URL System's, with accomplished, caring and efficient management, firmly believes that our recruiting services will continually uphold our single-most important.

#### **Goal**

"To do whatever necessary to successfully fulfill our consultant and client project requests not - yesterday, not tomorrow, but today." This philosophy rings true to those who have, and continue to call upon us. Let us know the type of Information Technology service anybody need to deploy and we will send a list of qualified candidates to select from and interview.

We have a pool of skilled software professionals nationwide with a wide range of experience and certifications. Engagements can be as short as a few months or up to a year. Even though URL Systems founded as a staffing, we are growing into a total solutions provider, offering a full range of Software Services to our corporate clients.

#### **Industries**

URL Systems is planning to offer cutting edge Applications, networking Infrastructure & Embedded Software solutions for industries such as Financial Sector, Government, Educational Institutions, Pharmaceutical industry, healthcare.

As a solutions provider, we help clients to design, build, deploy and manage reliable applications and networks. We provide our customers with reliable, secure applications and networks that facilitate customer relationships, enhance productivity and maximize profitability

Contract with URL Systems on a time and materials basis based on a carefully-managed, detailed project description, or, where requirements are firm and specific, we can operate as a fixed-priced developer or implementer.

#### **Methodology**

Effective business and development practices to drive timely and cost-effective solutions

Focus on iterative development process to reduce "late discovery" risk and meet critical customer timelines

Readily tailor our process to adapt to client development methodology

Experience in implementing software development process improvement to help clients improve development practices.

With Speed and accuracy in mind, URL Systems executes its search and topnotch professionals and cost effectively delivers to any business experienced individuals who possess the right qualifications, real time and international project experience and analytical and interpersonal skills. The need may be for a Project Manager, Business Analyst, Programmer Analyst or a Help Desk employee, URL Systems has a talent pool tapped to deliver resources to any client in need of permanent resource. URL Systems gives importance to every detail to ensure candidates and clients are matched for a long term relationship. We do not just provide bodies nor are we in business just to get a job. We work to enhance a candidate's career and build a client's asset.

### ***Contract Staffing***

URL Systems recruits and places its own full time employees, hires a contractor, or sub-contracts a single software professional and assigns them to the client site on a project-to-project basis. Our searches rely upon local, regional, national and international resources.

### ***Application Development***

URL Systems. is planning to provide application development in many areas, including client-server, database, GUI, ERP especially in SAP and system level software. We are planning in such a way that with an application development project from its start with user requirement analysis through to the implementation and testing phase of the development life cycle.

### ***Technology Partner Service***

Planning to locate, hire, train and dedicate its own consultants for very specific skills set and provides them to the customer base exclusively.

We deliver both software engineering and information technology staffing solutions to our technical team of experts with equal knowledge and skill. URL Systems dedicates for each client request that consists of a recruiter and an account manager. The account manager initiates and develops the relationship to understand client technology and process, as well as introduces our services. The relationship then incorporates the technical recruiter who will staff the project from start to finish. Each has decision-making responsibility, allowing them to respond and deliver to our client's satisfaction.

We are now concentrating in staffing IT professionals in the fields of

- Project Managers
- Architects
- Business Analysts
- Application Developers
- System & Embedded Engineers
- Database Administrators
- System Administrators
- ERP
- SQA & Software Test Engineers
